Bryce Bedford

AWS Cloud Engineer
US, brycebedford22@gmail.com, linkedin.com/in/bryceebedford, 804.301.9628

Professional summary

Cloud and DevOps-focused technical product and systems professional with experience supporting federal, fintech, and enterprise platforms across AWS, Azure, and secure cloud environments. Experienced deploying and maintaining cloud infrastructure, supporting automation-first DevOps workflows, and managing identity, security, and system reliability across regulated environments. Strong background in Agile delivery, scripting, and technical documentation supporting federal and commercial digital transformation initiatives.

Employment history

Digital Product Manager, Jan 2023 - Present

AON, Remote

- Supported cloud-hosted enterprise payment and insurance platforms operating across AWS and Azure environments, ensuring system reliability, secure integrations, and performance monitoring across 500K+ users
- Partnered with engineering to deploy and maintain compute assets, identity integrations (SSO/SAML), and cloud-based APIs supporting secure financial transactions and authentication
- Automated operational workflows using scripting and infrastructure configuration tools, improving deployment consistency and reducing manual provisioning effort by 35%
- Participated in Agile ceremonies and maintained system documentation, release notes, and technical requirements for cloud-based product deployments and infrastructure updates

Product Manager, Apr 2022 - Jan 2023

FRINGE, Remote

- Partnered directly with engineering to support deployment and scaling of a cloud-native HRIS and payments platform hosted in AWS, ensuring reliability, security, and performance across external client integrations
- Managed technical requirements and system documentation for API-based integrations with payroll, benefits, and financial partners, enabling secure data exchange and reducing manual processing by 30%
- Collaborated with DevOps and engineering teams to improve release processes and automate environment configuration, reducing production defects and deployment delays across quarterly releases
- Acted as primary liaison between product, engineering, and external partners to troubleshoot system issues, monitor platform performance, and ensure stable operation of customer-facing cloud applications

Senior Consultant, Aug 2020 - Aug 2022

PROTIVITI, Washington, DC

- Supported federal and financial clients with cloud readiness, compliance, and infrastructure modernization initiatives across AWS and hybrid environments
- Assisted with system configuration, process automation, and technical documentation for secure environments aligned to SOC2, NIST, and federal security standards
- Conducted requirements analysis, system mapping, and technical writing for transformation initiatives impacting cloud and enterprise IT systems
- Collaborated with engineering and security teams to support identity access management, system hardening, and risk mitigation efforts

Education

Doctor of Philosophy (Ph.D.)

Howard University, Washington, DC, US

Economics Evening Program - In Progress

Master of Arts (M.A.)

Virginia State University, Petersburg, VA, US

Communications and Media Management

Bachelor of Arts (B.A.)

Old Dominion University, Norfolk, VA, US

Economics

Skills

AWS Cloud Infrastructure, Azure Cloud Services, Terraform (IaC), Cloud Automation, DevOps, CI/CD Pipelines, Python, Bash Scripting, Identity & Access Management (SSO/SAML), Red Hat Linux Administration, Windows Server Administration, Cloud Security & Compliance (NIST/SOC2), Git Version Control, Agile/Scrum Delivery, Technical Documentation, System Monitoring & Troubleshooting.

Additional information

Certifications

- Certified Scrum Master
- Certified Scrum Product Owner
- ITIL Foundation Certification (v4)
- Comptia Security+
- AWS Certified Solutions Architect Associate (In Progress)

Core Metrics

- $300M projected annual payment volume enabled through cloud-based platform modernization
- Supported infrastructure and product delivery across 119+ integrated product environments
- Improved deployment/release velocity by 30%+ through workflow and automation improvements
- Led roadmap and solution design for platforms supporting 500K+ end users
- Delivered cloud and architecture recommendations across multiple enterprise consulting engagements

Technical & Platform Skills

AWS (architecture, cost optimization, integration strategy), Cloud Infrastructure Strategy, CI/CD & Automation Concepts, API & Microservices Architecture, Identity & Access Concepts (SSO/IAM), Cloud Security & Compliance Alignment, Agile Delivery, Jira/Confluence, Technical Documentation, SQL, Python (basic scripting), Data & Platform Architecture
